

Solution avec un affichage non pyramidal

```
E = 7
7
878
68786
0687860
206878602
```

```
(*
* TASK : Bac TP 2015 (pyramide)
* LANG : Free Pascal
* Example: Affichage non pyramidal
*      pour e = 7
*)
```

```
procedure saisir(var e: byte);
begin
    repeat
        write('E = ');
        read(e);
    until e in [1..9];
end;
```

```

```
E = 7
 7
 878
68786
0687860
206878602
```

fig. #1

Pour pouvoir réaliser l’affichage en *fig. #1*, il faut savoir le nombre des lignes générées et donc les stocker dans un tableau.

```
(*  
* TASK : Bac TP 2015 (pyramide)  
* LANG : Free Pascal  
* Exemple: Affichage pyramidal  
*)
```
